Project Design Phase
Solution Architecture

Date	15 February 2025
Team ID	PNT2025TMID04160
Project Name	Vehicle Management System
Maximum Marks	4 Marks

- The **Vehicle Management System (VMS)** aims to bridge the gap between operational inefficiencies in fleet and vehicle tracking and a robust technology-driven solution. Below is the **solution architecture** that ensures scalability, security, and efficiency.

Example - Solution Architecture Diagram:
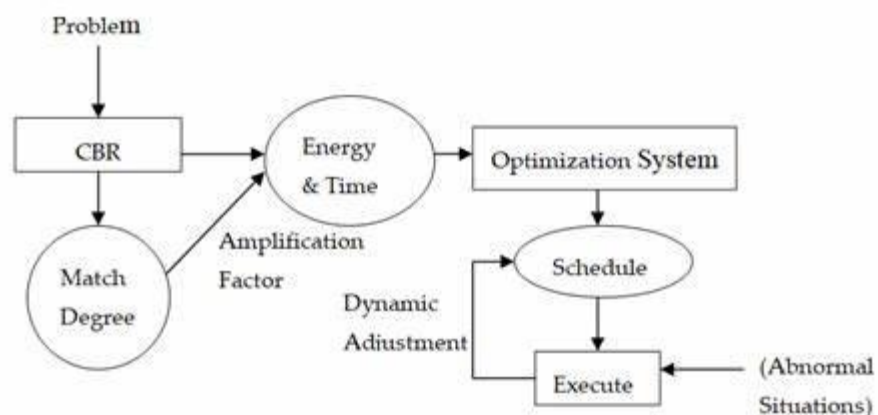

Vehicle Management System
